Dear Ion and Bev

Key Solar is endeavouring to update our website with honest testimonials from customers. We would appreciate it if you could take a minute to write a few words about your experience with Key Solar.

In these days of hype and doubtful maths about the return and value of solar power, it is a pleasure and reassuring to have a discussion with someone who knows his business.

Jeff and his team know the details, use quality components, install to and above standards and specs. - and teach you how to drive it. But there's more... in a few minutes, Jeff assessed our pattern of power use and came up with suggestions and quantifiable reasons to use LEDs instead of dichroic downlights, change our pool pump timing, etc.

No pushy salesmanship is needed when something makes sense and the sums add up.

We are now saving money without changing the way we live.

Good on you & your team, Bev & Ion

We thank you in advance for your time and effort and a self address envelope is enclosed for your convenience.

Thank you and regards

Caroline
